

Zeta Theta House Corporation Update Planning for the Future

Brothers,

We hope that you all have had a great holiday season and are recharged, and ready for the new year. We have a lot of exciting updates for you. First, we would like to thank everyone for the surge of support at the end of last year. It was a tough year for everyone, and we were faced with many challenges which forced all of us to adapt to many new circumstances. Thanks to your generosity, we were able to hit our goal for 2020. With these funds secured, we started the renovation on the OQ bathroom on time and finished for the undergrads as they start classes for the winter term.

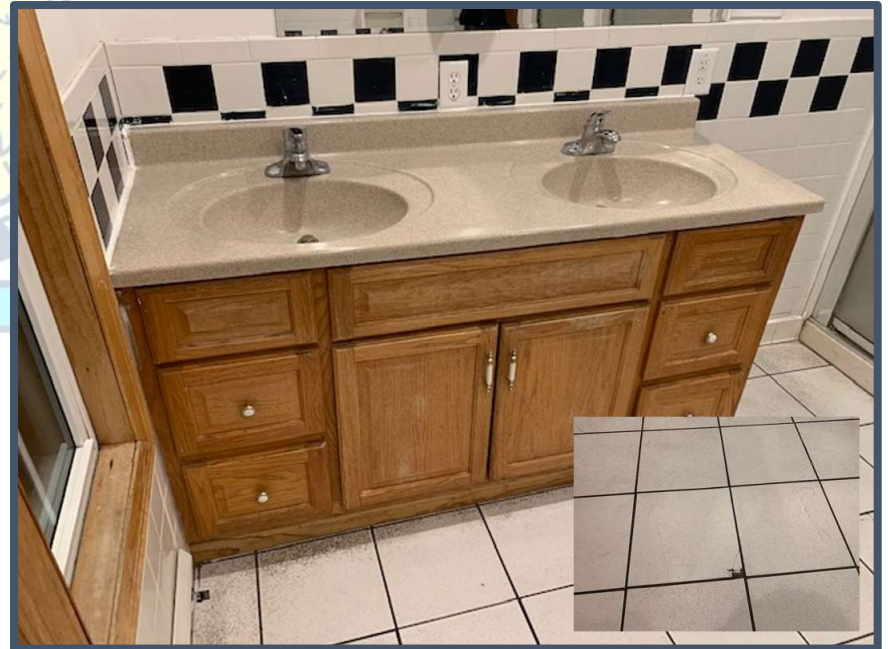

The bathroom was ripped down to the studs, and new wire and plumbing were installed with the walls removed. We also used this opportunity to increase the size of the drain in the sink of the hallway utility closet which often clogged. OSB board was installed behind the drywall to provide additional protection. This is the same method that has been used in all the refurbished rooms in the house and has worked very well. The shower units installed are one-piece fiberglass and are the same style that have used in the Addition Bathroom. These have held up well since they were installed in 2015, and we anticipate this same long-term durability for these units as well. Ventilation fans were installed in each shower unit to help reduce the buildup of excess moisture in the bathroom. The stainless steel around the bottom of the walls allows for quick and efficient cleaning as well as an additional level of sanitation, which is especially needed during these times.

Zeta Theta House Corporation Update Planning for the Future

We appreciate the constant support through this rocky year. We hope that you see the fruits from all your efforts with this renovation of the **NEW** OQ John. We will take a little break as we prepare to focus on a several different smaller projects in the TMA and Penthouse and a larger project working to refresh of the kitchen. Look for additional information as we approach the start of the project. Thank You, and we hope you all have a great New Year!
